

```
Menu
1. Input Data
2. Display Data Summary (Built-in Functions)
3. Calculate Factorial (Recursion)
4. Filter Data by Threshold (Lambda Function)
5. Sort Data
6. Display Dataset Statistics (Return Multiple Values)
7. Exit Program
```

Please enter your choice: 1

Choose :

- 1. 1D List
- 2. 2D List

Enter your choice: 1

Enter Data for 1D array(separated by spaces)

10 30 20 50

Data has been stored successfully!

Values using \*args:

10 30 20 50

Menu

- 1. Input Data
- 2. Display Data Summary (Built-in Functions)
- 3. Calculate Factorial (Recursion)
- 4. Filter Data by Threshold (Lambda Function)
- 5. Sort Data
- 6. Display Dataset Statistics (Return Multiple Values)
- 7. Exit Program

Please enter your choice: 1

Choose :

- 1. 1D List
- 2. 2D List

Enter your choice: 2

Enter Data for 2D [1][1] : 2

Enter Data for 2D [1][2] : 1

Enter Data for 2D [1][3] : 3

Enter Data for 2D [2][1] : 5

Enter Data for 2D [2][2] : 6

Enter Data for 2D [2][3] : 4

Enter Data for 2D [3][1] : 8

Enter Data for 2D [3][2] : 7

Enter Data for 2D [3][3] : 9

2 1 3

5 6 4

8 7 9

Data has been stored successfully!

Values using \*args:

2 1 3 5 6 4 8 7 9

Menu

- 1. Input Data
- 2. Display Data Summary (Built-in Functions)
- 3. Calculate Factorial (Recursion)
- 4. Filter Data by Threshold (Lambda Function)
- 5. Sort Data
- 6. Display Dataset Statistics (Return Multiple Values)
- 7. Exit Program

Please enter your choice: 2

Dataset Summary (\*\*kwargs):

Total elements: 9

Minimum: 1

Maximum: 9

Sum: 45

Average: 5.0

Menu

```
Menu
1. Input Data
2. Display Data Summary (Built-in Functions)
3. Calculate Factorial (Recursion)
4. Filter Data by Threshold (Lambda Function)
5. Sort Data
6. Display Dataset Statistics (Return Multiple Values)
7. Exit Program
Please enter your choice: 3
Enter a number to calculate its factorial: 5
Factorial 5 is: 120
Menu
1. Input Data
2. Display Data Summary (Built-in Functions)
3. Calculate Factorial (Recursion)
4. Filter Data by Threshold (Lambda Function)
5. Sort Data
6. Display Dataset Statistics (Return Multiple Values)
7. Exit Program
Please enter your choice: 4
Enter a threshold value: 5
Filtered Data (values >= 5):
[5, 6, 8, 7, 9]
Menu
1. Input Data
2. Display Data Summary (Built-in Functions)
3. Calculate Factorial (Recursion)
4. Filter Data by Threshold (Lambda Function)
5. Sort Data
6. Display Dataset Statistics (Return Multiple Values)
7. Exit Program
Please enter your choice: 5
Choose Data Type:
1. 1D List
2. 2D List
Enter your choice: 2
Choose Sorting Order:
1. Ascending
2. Descending
Enter your choice: 1
2D Data Sorted in Ascending Order:
1 2 3
4 5 6
7 8 9
Menu
1. Input Data
2. Display Data Summary (Built-in Functions)
3. Calculate Factorial (Recursion)
4. Filter Data by Threshold (Lambda Function)
5. Sort Data
6. Display Dataset Statistics (Return Multiple Values)
7. Exit Program
Please enter your choice: 6
Min: 1 Max: 9 Sum: 45 Average: 5.0
Menu
1. Input Data
2. Display Data Summary (Built-in Functions)
3. Calculate Factorial (Recursion)
4. Filter Data by Threshold (Lambda Function)
5. Sort Data
6. Display Dataset Statistics (Return Multiple Values)
7. Exit Program
Please enter your choice: 7
```
